### **Airport Operations Forecast Approval – (PIL) Cameron County Airport**

Ms. Burks,

TxDOT Aviation has completed review of forecast information for Cameron County Airport (PIL). We have found the forecast to be supported by reasonable planning assumptions and current data and developed using acceptable forecasting methodologies. However, based on the lack of operation counts, we have determined that the ultimate critical aircraft, RDC C-II, is a conceptual scenario and is accepted for planning purposes. Accordingly, this forecast is approved and accepted for use in the Airport Layout Plan with Narrative for Cameron County Airport.

The acceptance or approval of the forecast does not automatically constitute a commitment on the part of TxDOT to participate in any development recommended in the ALP with Narrative or shown on the ALP. TxDOT Aviation approval of the baseline scenario in this forecast does not constitute justification for future projects. Justification for future projects will be made based on activity levels at the time the project is requested for development. Further, the approved forecast may be subject to additional analyses if the fundamental rationale of the forecast or the critical aircraft changes materially.

If you have any questions concerning this letter, please contact me by phone at (806) 220-1572 or [Daniel.Benson@txdot.gov](mailto:Daniel.Benson@txdot.gov)

Sincerely,

*Daniel Benson*
